Success in the NTSE examination is a great achievement. NTSE examinations test analytical and logical skills. A good understanding of the subject is needed and rote learning or memorization will not yield results. These students have proven their caliber and brought glory to Mangalore by being amongst the **only 51** selected students from Karnataka. A total of **975** students have been selected this year from the country at the **nationwide competitive examination** conducted by the National Council for Education and research, (NCERT) an institution, working in the direction of nation building.

These successful students are also called **NTS SCHOLARS**. They will be eligible for a scholarship of Rs. **15,000/-** per annum for 1<sup>st</sup> & 2<sup>nd</sup> PUC/XI & XII Std. ; **Rs. 24,000/- p.a.** for under-graduation & post-graduation studies and later according to the UGC rules until they finish their Ph.d. NTSE scheme covers areas like sciences, social sciences, engineering, medicine, management and law. [www.ncert.nic.in](http://www.ncert.nic.in)

The selection process for NTSE is in two stages. First, State Level and then National Level. This year 81,146 students had appeared for the State Level (Stage 1) exam from Karnataka which was held on 17<sup>th</sup> November 2015. The Department of State Education and Research Training (DSERT) had selected 208 students (0.256%) among them. The candidates qualifying the Stage 1 from different states are eligible for appearing in the Stage-2 exam. Each year around 4,000 students from the country are selected from Stage-I to appear in the second stage of the examination.

NTSE is a flagship activity of NCERT in the direction of nation building for identifying and assisting around 1000 most talented students studying in X standard from all over India, **year after year** and nurturing them through generous scholarships and opportunities.

**This is a very important competitive examination for students which no student should miss. The application forms for the students now in X standard are available on the website [www.dsert.kar.nic.in](http://www.dsert.kar.nic.in) and the last date for application is 8<sup>th</sup> Sept 2016.**

CFAL aims to promote a passion for Math and Science learning among students and has the best results in Mangalore in all STEM related examinations including JEE, NTSE, KYPY, Olympiads etc. The outstanding results of our students prove that given the right learning environment, children from the region can outperform their peers from the Tier 1 cities. While rote learning and learning for the sake of marks characterizes many institutions in the region, passion for the subject is what CFAL aims to attain. The outcome is deep understanding of the subject and excellence in math and science. The vision of CFAL is to inculcate interest in basic sciences and to encourage research and innovation in the field of Math and Science
